

Studio 14 - WordPress Developer Test

The document is a programming exercise to evaluate your frontend and WordPress skills and approach to developing custom plugins and themes for the WordPress platform.

Instruction

1. Please create a vhost in your local development environment with hostname set as: s14.local
2. Download the latest Wordpress (5.5.3) and install it on your local site. (i.e. site url and home url should be http://s14.local)
3. Please keep username as admin and password as admin
4. Once the installation is completed, replicate this [design](#) using WP (underscores). You will need to create a Figma account if you don't already have one to view the inspect mode and access the images.
5. Please create a theme settings page (without using any plugin). Theme settings should include the following-
 - Image Upload for Logo
 - Phone Number in Footer
 - Address Information in Footer
 - Email Information in Footer
 - Social Media Links in Footer
6. Page content should be manageable within Wordpress.
7. You can download the Brown font [here](#).

How to submit:

Please make sure you've followed the above instructions before submitting your solution.

Please follow instructions below to submit:

- Export the database in sql format
- Create a single Zip file of your WordPress site (please include DB file in the root folder)
- Return the (zipped) solution within 48 hours by email to tobi@studio14online.co.uk (or a link to a Google drive folder with the zipped solution)
- Ask any questions by emailing the above address
